WorldAware's TravelKit app

Keeping personnel informed of safety and security issues worldwide, and providing them a tool to reach out for help from the touch of a button, all from the TravelKit mobile app.
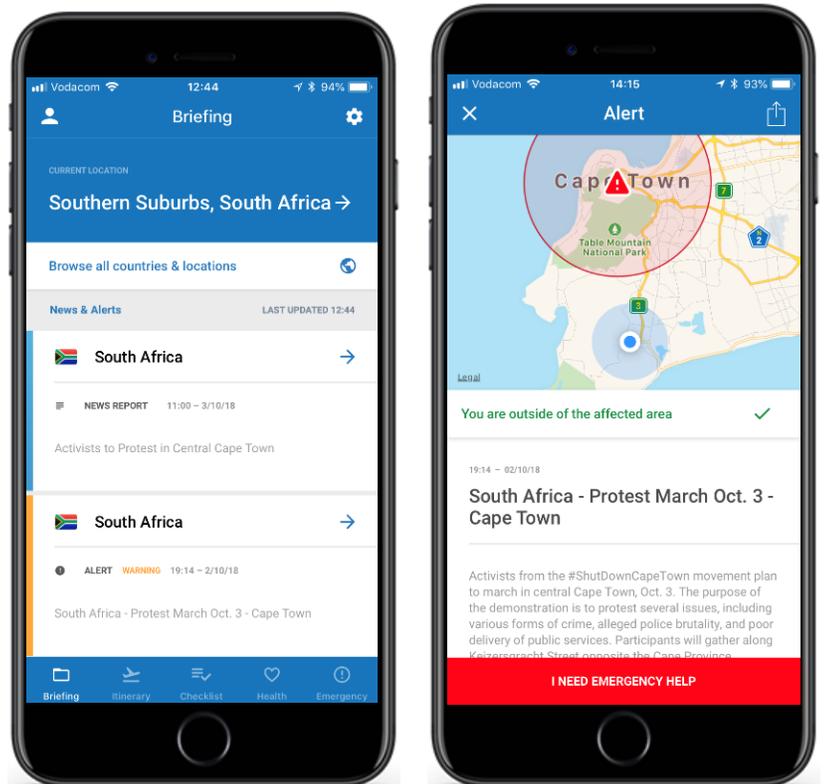

Having the right tools at hand are essential when wanting to stay informed of developments at home and abroad. TravelKit is a standalone mobile app that allows users to minimize their exposure to risks, avoid threats and easily connect with emergency contacts if necessary. The app harnesses the extensive analytical and operational strength of WorldAware, providing support and awareness of global developments, 24/7, from our operational centers in Annapolis, London, Cape Town, and Singapore.

Due to the apps geolocation capabilities it is as beneficial when at home or abroad, notifying personnel of risks and disruptions in their area, no matter where they are.
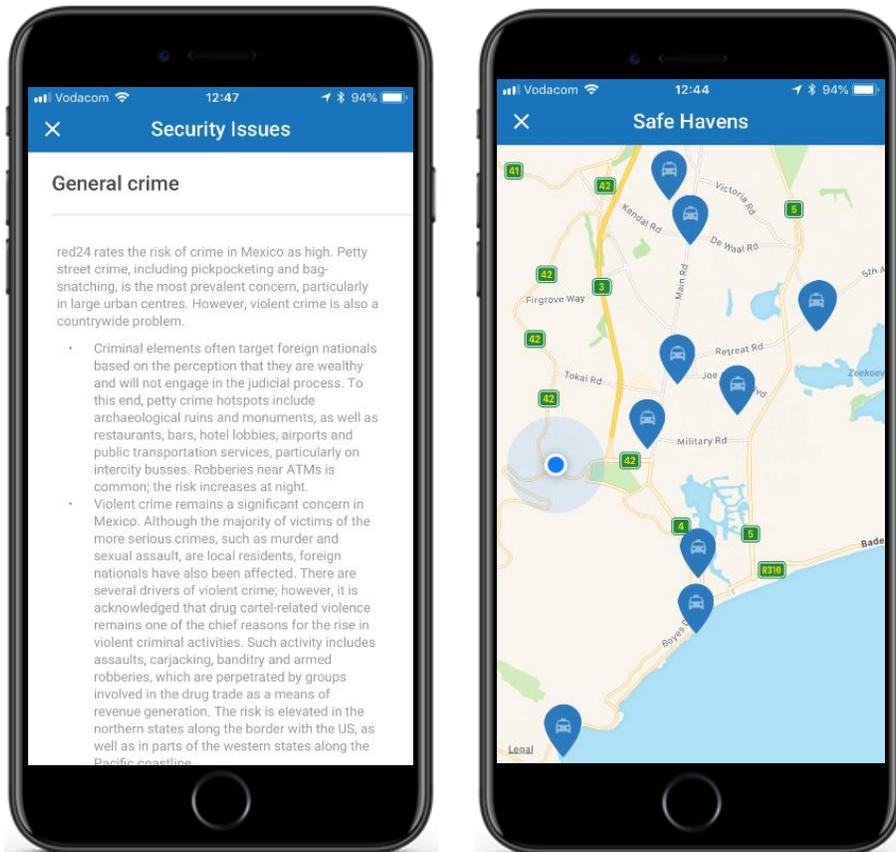

Benefits of the TravelKit app includes:

With TravelKit, you can be assured your people have everything they need—all in the palm of their hand—to travel and work in safety, allowing you to focus on other important aspects of your business.

- **Country intelligence**, Immediate access to intelligence for over 200 countries and territories that includes informative quick-reference risk indicators and in-depth information on topics such as security issues, transportation, cultural factors, and environmental concerns.

- **Alerts:** Prompt notification of any safety, security and travel-related incidents in the user's location; or for any other locations on the itinerary, or countries that have been subscribed to.

- **Geolocation:** A mapped reference of the incident in relation to the location of the user gives extra clarity of proximity to any concern.

- **Itinerary:** Itineraries and flight numbers can be loaded into the app and notify of any major delays or cancellations regarding travel.

- **Emergency hotline:** Assistance can be requested at any time by calling an emergency hotline via a single click.

- **Health intelligence:** Research the destination before traveling to understand any health risks, recommended inoculations and the level of healthcare infrastructure and support.
- **Pre-trip checklist:** With the itinerary added, automatic prompts provide reminders of passport and insurance documentation that is needed for the trip.
- **Safe-haven location:** With geolocation active, users can see the closest safe-havens in their vicinity, including hospitals and police stations. The app also provides a list of local emergency numbers.

Provide your personnel a comprehensive mobile app that provides a range of features to increase their safety and enhance your Travel Risk Management Plan.

Download TravelKit

TravelKit is available from the Apple App Store and on Google Play for Android.
